(a) Effective exponent vs urbanization
Primary
Secondary
Tertiary
β = 1
u* = 0.75
u* = 0.80
β_eff(u)
Urbanization ratio u
(b) 20-quantile LOWESS (Tertiary)
LOWESS
Quantile β
Crossover = 0.836
β (Tertiary GDP)
Urbanization ratio u (bin median)
(c) Bootstrap distribution (n=500)
OLS u* = 0.801
2.5% = 0.721
97.5% = 0.915
Density
u* (Tertiary crossover)
